

The Academic Alert System: a helpful tool for students and instructors.

Missouri S&T is committed to the success of its students by providing an environment conducive to teaching and learning. To ensure that every student takes full advantage of the educational opportunities and support programs on campus, the university has implemented the **Academic Alert System**.

The Academic Alert System is a web-based application that supports communication among instructors, advisors, and students. The purpose of the Academic Alert System is to improve the overall academic success of students by improving communication among students, instructors and advisors; reducing the time required for students to be informed of their academic status; and informing students of actions necessary by them in order to meet the academic requirements in their courses.

How Does It Work?

To access the Academic Alert System (on-campus), visit:
